EDUCATION

2022 - 2026

Jansons institute Of Technology

- B.Tech Artificial Intelligence & Data Science

2021 - 2022

Vailankanni MHSS

- 12th Std

SKILLS

Technical skills: Python, Javascript, ML, java

Tools and framework: HTML, CSS, React, Github, Canva.

Soft Skills: Communication, Teamwork, Problem-solving, Critical-thinking.

PROFILE

I am an aspiring AI and Data Science professional currently pursuing my Bachelor's degree in Artificial Intelligence and Data Science from Jansons Institute of Technology. I am passionate about leveraging AI to solve real-world problems, and I constantly seek to expand my skills through practical projects. Along with my technical expertise, I possess strong communication, leadership, and teamwork abilities

EXPERIENCE

ABC Technologies

ML Intern

I completed a 1-month Machine Learning internship at ABC Limited, where I gained practical experience in ML model development, data preprocessing, and algorithm implementation.

Codsoft

Data science intern

I completed a 1-month data science internship at Codsoft, working on real-world data analysis and machine learning projects. I gained experience in data preprocessing, EDA, and model development using Python libraries. The internship sharpened my data science skills and problem-solving abilities.

CERTIFICATION

- Data science codsoft
- Soft skills
- Front end development
- Front end development (Udemy)

PROJECTS

- Data science project (Codsoft)

Titanic survival Prediction, IRIS flower classification, Movie Rating Prediction and Sales Prediction, here i learn about how ML algorithm plays major role in it that helps to decide end result of it.

- Global YouTube statistics - ML Project

A machine learning project analyzing global YouTube statistics to uncover trends, predict video performance, and gain insights into viewer engagement across regions.

- A Simple calculator (HTML, CSS, JS)

A basic web-based calculator built using HTML, CSS, and JavaScript to perform standard arithmetic operations with a clean and responsive UI.
